18	MPCB- CONSENT- 0000095398	Mahindra Vehicle Manufacturers Limited, Plot No. A-1 Plot No. A-1, Chakan Industrial Area, Phase IV, Tal:- Khed, Dist:- Pune Khed	APPROVED Renewal with Increase in Capital Investment	30.09.2021	<p>Committee noted that, PP has applied for renewal of consent with increase in CI for production of Automobile industrial heavy & medium commercial vehicles, component aggregates like transmission, axle engine etc. including job work and Construction equipment's 400000 Nos/Year. PP has already obtained C to E in 2016 for increase in CI.</p> <p>Committee also noted that, PP has provided combine ETP and two STPs. Treated effluent used for gardening purpose within premises. Industry has made the provision of 90 acres of land which will be covered under plantation. At present, 26 acres of land is provided for gardening purpose based on quantity of wastewater generated. JVS results are within the consented norms. Also, PP intended to keep 2 STPs on standby mode and treat entire effluent in their combine treated plant, as the generation of sewage is reduced due to lockdown.</p> <p>Committee also noted that, earlier Board has imposed consent condition to recycle part of the treated effluent in the</p>

					<p>process, cooling tower etc. and remaining for gardening. However, industry is using entire effluent for gardening purpose as they have adequate land available for gardening. Also to maintain the green belt development inside the premises, there is requirement of water which is being met by using treated water instead of freshwater.</p> <p>Committee further noted that, PP has provided RO & MEE for achieving zero discharge system but currently kept as stand by. This issue was discussed at the time of last renewal and CAC had called PP for presentation regarding details of metal bearing effluent treatment and not operating MEE.</p> <p>PP has submitted presentation copy, but due to lockdown presentation was not completed. In PPT Industry mentioned that, Typical surface treatment (like passivation, pickling & plating) generate concentrated stream called “metal bearing waste”, however these are not part of their process. Traces of Nickel & Zinc in effluent are easily getting removed during Lime and Alum Chemical Treatment at Primary Clarifloculator.</p> <p>Regarding non-operation of MEE, PP mentioned that- they have Started setting up the plant in 2007, for complying with “the then” River Regulatory Zone Policy (RRZ) of GoM, the Board had issued 1st CTO with ZLD condition in 2009. As per the CTO condition they have provided RO/MEE, however being not cost intensive technologies not operated and approached NEERI Nagpur for green technologies. NEERI recommended “High Rate Transpiration System”. The PP & NEERI presented the “green” project before CAC in 2010. MPCB permitted implementation of HRTS & allowed to keep RO & MEE stand by.</p> <p>Subsequently, in 2015, GoM cancelled RRZ policy. MPCB issued CTO for normal disposal pathway as “ on land for plantation/gardening”.</p>
