

REPORT ON MONITORING OF AMBIENT NOISE POLLUTION DURING GANESH FESTIVAL, 2015

MAHARASHTRA POLLUTION CONTROL BOARD
Kalpataru Point, 3rd Floor, Sion (East), Mumbai-400011
Website: www.mpcb.gov.in

FOREWORD

Ganesh Festival is one of the main festivals in Maharashtra. Large numbers of people participate in the immersion procession culminating the 10 days festival. Vocal music and musical instruments during the festival often lead to high levels of noise. Since last few years Maharashtra Pollution Control Board is monitoring ambient noise levels in Ganesh Festival Period.

This report is based on the extensive noise monitoring study conducted by Maharashtra Pollution Control Board at 132 locations all over Maharashtra covering 26 corporations for the 5 days period during Ganesh Festival i.e. on 17th, 18th, 21st, 23rd, & 27th Sept"2015 for 24hrs on First day of monitoring and from 18.00 hrs. to 24.00 hrs continuously for 6 hours, in the remaining days, comprising residential, commercial and silence zones.

This report contains the methodology and observations made during the study. The noise levels were found to be exceeding the permissible limits in all cities and at almost all locations.

The data and the trends in variation in noise levels in different Metropolitan cities can help the authorities including police authorities and Municipal bodies to develop strategies and plan for the next year. The report is being placed on MPCB website for wider dissemination of information and for public awareness.

Field monitoring of this study was conducted by M/s.Mahabal Enviro Engineers Pvt.ltd and was supported by all Regional Offices of the Board in the field. The entire study work including planning, coordination and report preparation was done at APC division of the Board. The contributions of Shri V.M.Motghare, Joint Director and Shri S.C.Kollur, Scientific Officer are appreciated.

 (Dr. P. Anbalagan, IAS)
Member Secretary

Introduction

Ganesh festival is one of the important festival which is celebrated all over Maharashtra since the late 19th Century. It isn't clear when Ganesh Chaturthi was first celebrated. History records the festival being celebrated in Pune as a public event during the reign of Shivaji, the founder of the Maratha Empire in 1630-80. From 1749 till 1818, the Peshwas encouraged the celebrations in Pune. With the fall of the Peshwas, the Ganesh Chaturthi festival lost its state support and became a private family celebration till its renewal by Lokmanya Tilak. In 1893, Lokmanya Tilak changed the family festival into a large public event. He popularized Ganesh Chaturthi as a major festival in order to bridge the gap between different castes and generate patriotic zeal among people against the British rule.

The festival is celebrated for 11 days People bring home and also to public Pandals idols (murtis) of Lord Ganesha and celebrate the festival by worshiping the Lord in a special way for a day and a half, 3 days, 5 days, 7 days or 11 days depending on the family tradition and commitment of each individual. The festival initiates Air and Noise pollution as colours (specially red), drums and Loud speakers are used while taking the Ganesh idols for immersion. Water pollution is also caused as the idols are immersed in water bodies like sea, river or lake.

Some of the main Environmental impacts of Ganesh Festival is the water pollution caused by the immersion of Plaster of Paris idols into natural water bodies, the water pollution caused by chemical paints used on these idols, the waste generated by the non biodegradable accessories used during the worship which are collectively referred to as 'nirmalya' which mainly include flowers, fruits, coconuts, cloth, incense, camphor etc., air pollution caused due to use of colors and noise pollution due to traffic congestion, use of drums and DJ sets etc.

Maharashtra Pollution Control Board have been carrying out study of the ambient noise levels in the state of Maharashtra during the period of Ganesh Festival for more than 8 years as a continuous process. Noise monitoring was carried out at 132 locations from 26 Municipal Corporation of Maharashtra for 5 days period during Ganesh Festival i.e. on 17th, 18th, 21st, 23rd & 27th September 2015 for 24 hours on the first day of monitoring and from 6 PM to 12 AM in the remaining four days for each location which comprise of residential, commercial and silence zone. This year 47 new locations have been added to the list of monitoring location.

A Review of Noise Descriptors

Sound is usually made up of a wide range of different frequencies. The spread of sound energy across the audible frequency "spectrum" (about 20Hz – 20kHz) is one factor that helps to make it identifiable to the human ear. The human ear is a very sensitive system with an extensive dynamic range. To accommodate this very large range, sound levels are measured using the **decibel (dB) scale**.

A sound level meter theoretically has a flat response, in other words it responds exactly the same at different frequencies. Unlike a sound level meter, the human ear responds differently at different frequencies, so a weighting, or filter, can be used so that the meter responds more like the human ear. The most commonly used weighting is referred to as the '**A**' weighting and readings are usually measured in dBA. The "**sound pressure level**" (SPL) is twenty times the logarithm to the base 10 of the ratio of the effective pressure (p) of a sound to the reference pressure (Pr) of 20 µPa. Thus the sound pressure level in dB = 20 log₁₀ P/Pr.

In most cases, the sound and noise we hear are not steady. Apart from variation in tones, the magnitude or the sound pressure level of a sound or noise changes with time. The equivalent continuous noise level (L_{eq}) is the sound pressure level of a steady sound that has, over a given period, the same energy as a fluctuating sound in question.

The sound level limits specified by CPCB, represent the general limitation on noise produced by noise sources. Some noises, however, are annoying no matter where or in what kind of environment they exist. High level impulsive noises represent a special category and, consequently, are restricted by an absolute limitation.

The Central Pollution Control Board (CPCB) constituted a National Committee of Experts on Noise Pollution Control. The Committee recommended noise standards for ambient air and for automobiles, domestic appliances and construction equipment, which were later notified under The Environment (Protection) Act, 1986 as given below:

Table 2.1: Standards of Noise Levels under EPA (1986): Noise Pollution (Regulation & Control) Rules, 2000

| Area Code | Category of Area | Limits in dB(A) L_{eq} | |
|-----------|------------------|--------------------------|------------|
| | | Day time | Night time |
| A | Industrial area | 75 | 70 |
| B | Commercial area | 65 | 55 |
| C | Residential Area | 55 | 45 |
| D | Silence Zone | 50 | 40 |

Note:

1. Day time is reckoned from 6 A.M. To 10 P.M.
2. Night time is reckoned in from 10 P.M. and 6 A.M.
3. Silence zone is referred as areas within 100 meters around premises such as hospitals, educational institutions and courts. The Silence zones are to be declared by the Competent Authority.
4. Use of vehicular horns, loudspeakers and bursting of crackers shall be banned in these zones.
5. Mixed categories of areas should be declared as one of the four above mentioned categories by the Competent Authority and the corresponding standards shall apply.

State GR / Notification: Implementation Authority for Noise Rules in Maharashtra is enclosed at **Annexure - III**

Methodology of the project

The ambient noise monitoring was carried out during the period of Ganesh Festivals for 132 locations which is covered under 26 Municipal Corporation all over Maharashtra. The monitoring was carried out for 5 days considering the noise that generate during the festival. On the first day of Ganesh Festival, i.e. on Ganesh Chaturthi or Vinayaka Chaturthi (17th September), a 24 hours monitoring have been carried out and on the remaining 4 days i.e. on 18th, 21st, 23rd and 27th September, 6 hours noise monitoring was carried out from 6 PM to 12 AM. The noise monitoring was carried out using calibrated Sound Level Meters (Type II) kept at the fast response mode keeping in view the quickly changing nature of noise levels, and using 'A' filter.

The details of number noise monitoring locations in different Municipal Corporation all over Maharashtra as provided in **Table 3.1** below:

Table 3.1: Noise Monitoring Locations in Maharashtra during Ganesh Festival: 2015.

| Sr. | Municipal Corporation | Number of locations |
|------------|------------------------------|----------------------------|
| 1. | Mumbai | 25 |
| 2. | Navi Mumbai | 05 |
| 3. | Thane | 09 |

| Sr. | Municipal Corporation | Number of locations |
|------------------------------|-----------------------|---------------------|
| 25. | Akola | 03 |
| 26. | Solapur | 04 |
| Total No. of stations | | 132 |

The detailed list of locations is given in **Annexure I**.

Results

Hourly Noise Levels on 17th, 18th, 21st, 23rd and 27th September, 2015 during Ganesh Festival at different locations in Maharashtra is given in **Annexure II**. The equivalent steady sound level of a noise energy-averaged over time was calculated represented as L_{eq} based on which the impact of noise created during the festival is measured. The formula for calculating L_{eq} is as given below:

$$L_{eq, T} = 10 \log \left(1 / n \sum_{i=1}^n 10^{\frac{L_i}{10}} \right)$$

Where, L_i = levels observed at n equally spaced times during interval T.

In the present study, hourly and day wise L_{eq} has been calculated to compare the results obtained from various locations.

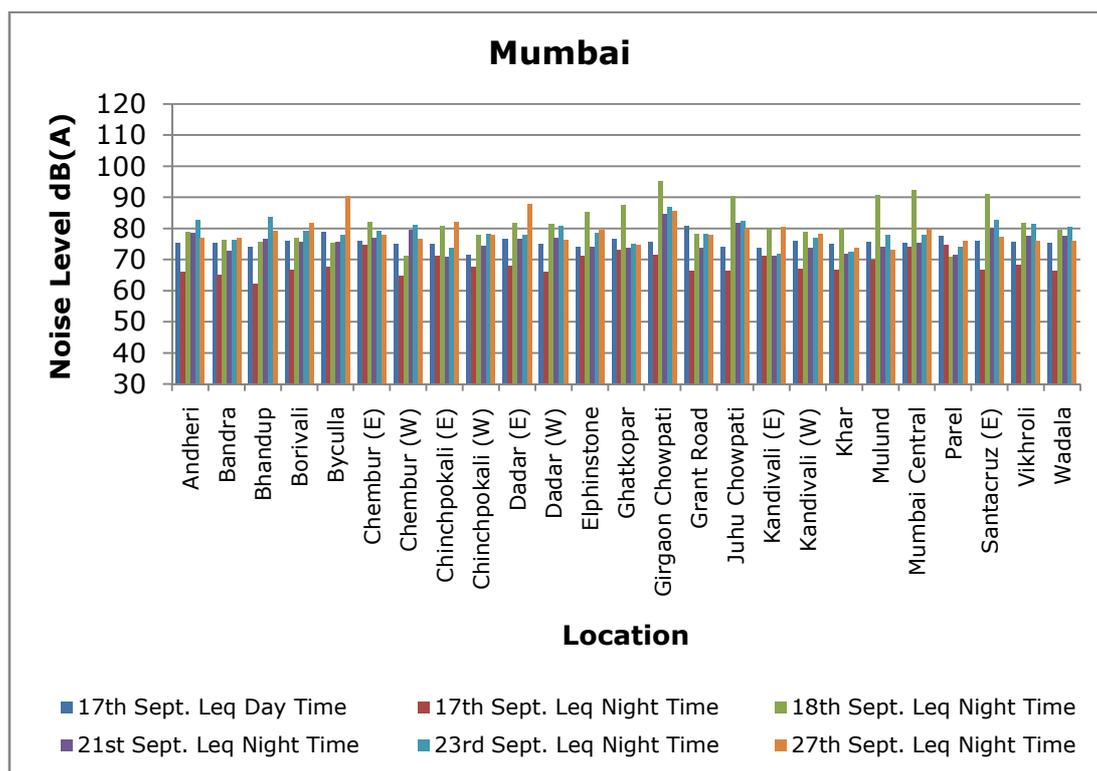

1. Mumbai

In Mumbai a total of 25 location where monitored. The L_{eq} noise level during night time was found to be high during night time specially on 18th, 23rd and 27th September. The highest noise level of 105.9 dB(A) was observed at Juhu Chowpati on 27th September which is the last day of visarjan. The increase in noise level was due to the crowd gadered in the area for visarjan.

Table 6.1: Equivalent Continuous (L_{eq})dB(A) Noise Levels in Mumbai

| Location | L_{eq} Day Time (17 th Sept.) | L_{eq} Night Time (17 th Sept.) | L_{eq} Night Time (18 th Sept.) | L_{eq} Night Time (21 st Sept.) | L_{eq} Night Time (23 rd Sept.) | L_{eq} Night Time (27 th Sept.) |
|-------------------------|---|--|--|--|--|--|

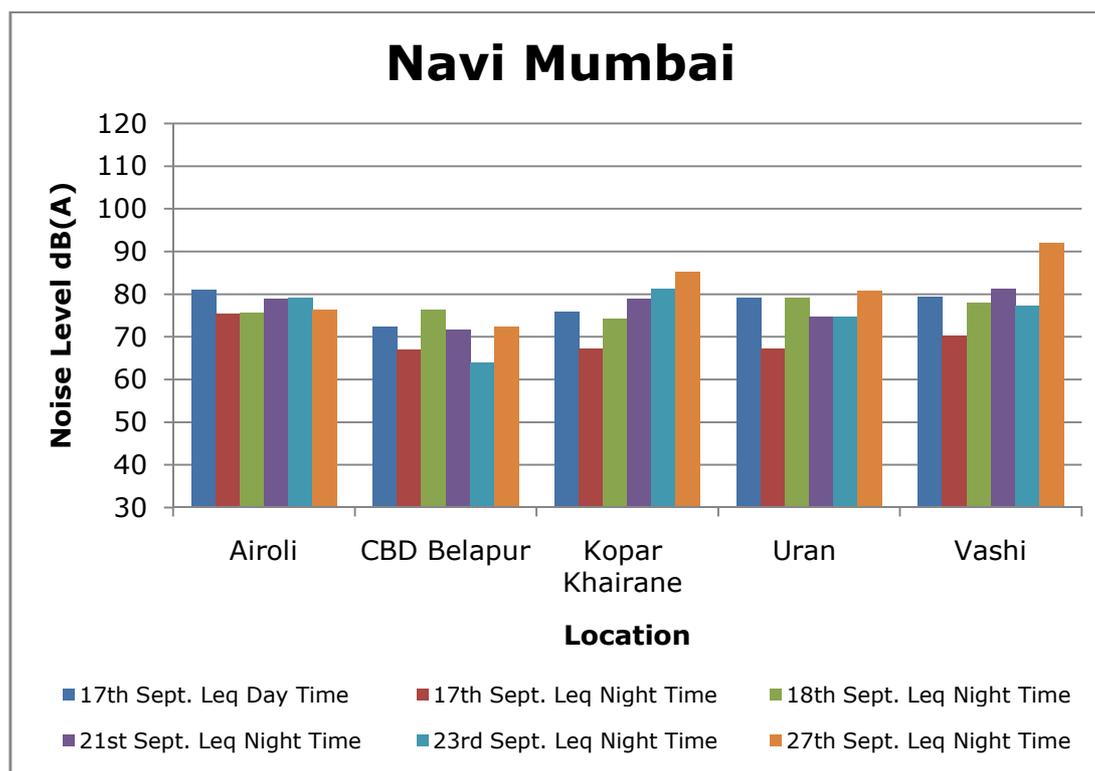

Chart 6.1: Noise levels during Ganesh festival in Mumbai

2. Navi Mumbai

In the five location monitored in Navi Mumbai, the highest noise level was observed at Uran - Ganpati Chowk with 92.1 dB(A) on 27th September. The noise level during night time exceeded the permissible limit. The increase in noise level is due to the pandals and also traffic caused due to the proceedings of visarjan.

Table 6.2: Equivalent Continuous (L_{eq})dB(A) Noise Levels in Navi Mumbai

| Location | L_{eq} Day Time (17 th Sept.) | L_{eq} Night Time (17 th Sept.) | L_{eq} Night Time (18 th Sept.) | L_{eq} Night Time (21 st Sept.) | L_{eq} Night Time (23 rd Sept.) | L_{eq} Night Time (27 th Sept.) |

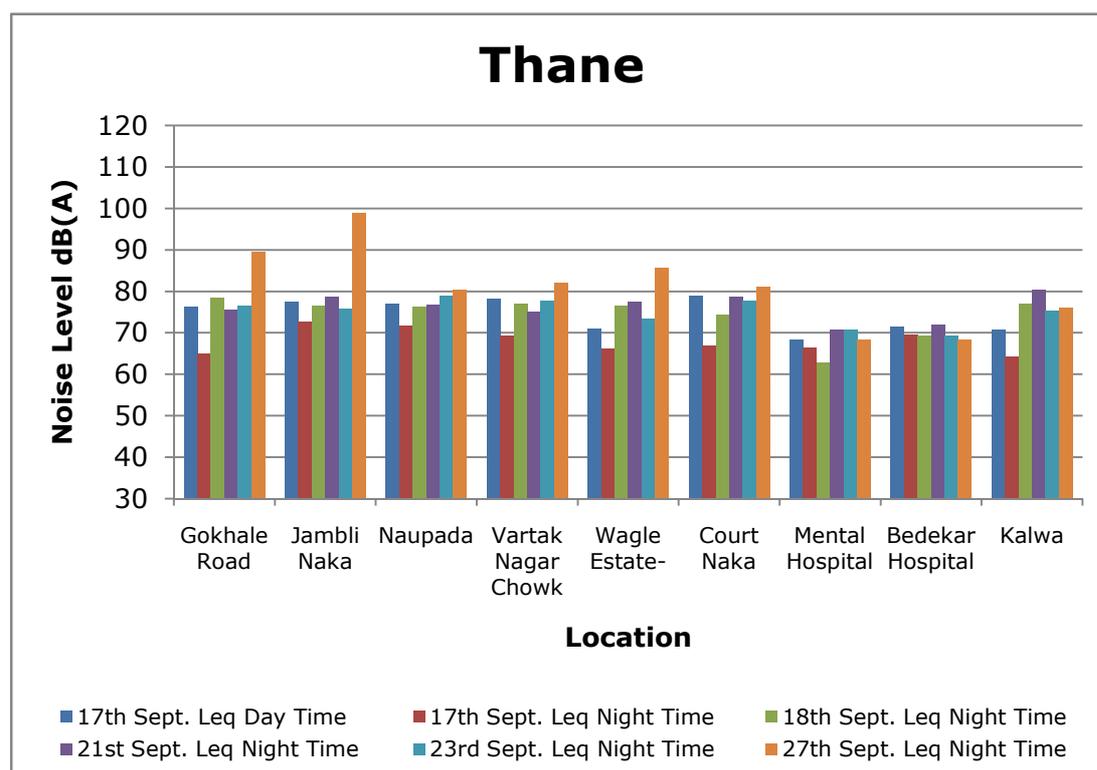

Chart 6.2: Noise levels during Ganesh festival in Navi Mumbai

3. Thane

The maximum noise level during night time was observed at Jambli Naka- Lake immersion Point with 99.9 dB(A) on the last day of visarjan which was mainly caused by the crowd gathered for visarjan. All the nine location monitored, had noise level higher than 62.8 D(B) both during day time and night time.

Table 6.3: Equivalent Continuous (L_{Aeq})dB(A), Noise Levels in Thane

| Location | L_{Aeq} Day Time (17 th Sept.) | L_{Aeq} Night Time (17 th Sept.) | L_{Aeq} Night Time (18 th Sept.) | L_{Aeq} Night Time (21 st Sept.) | L_{Aeq} Night Time (23 rd Sept.) | L_{Aeq} Night Time (27 th Sept.) |

Chart 6.3: Noise levels during Ganesh festival in Thane

4. Pune

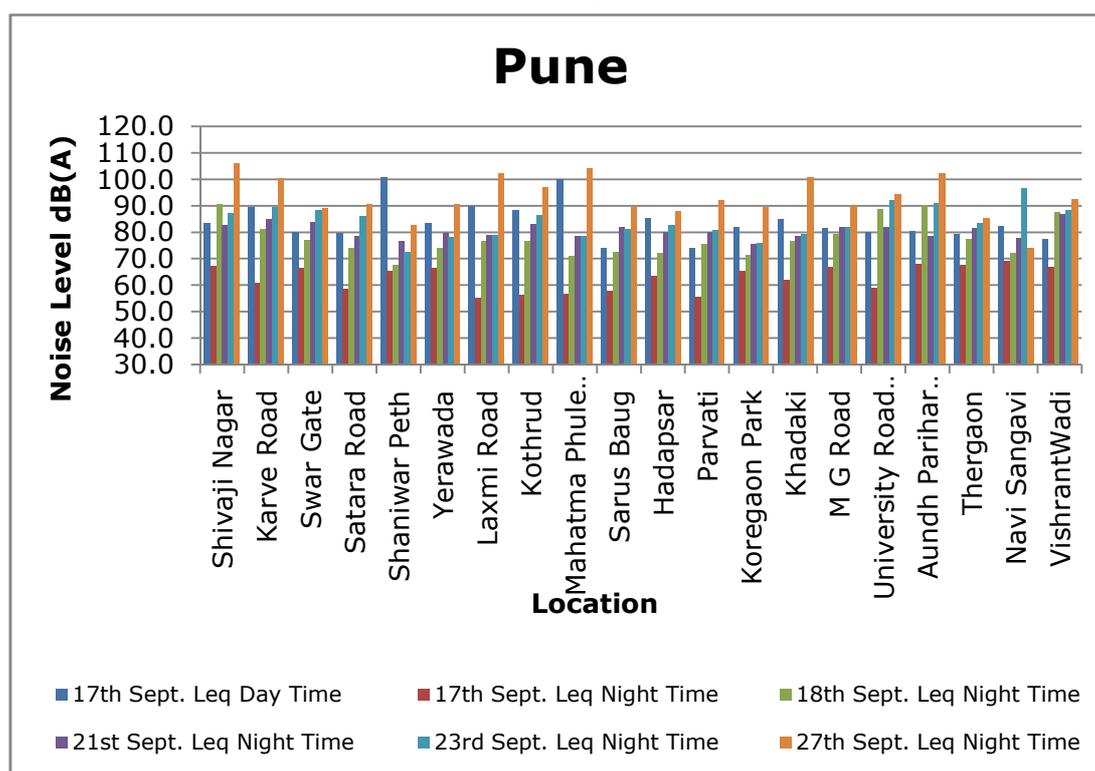

The noise level in Pune during Ganesh festival in many location have gone beyond 100 dB(A) proving the city noisy. The highest noise level was observed at shivaji nagar on 27th September. The noise levels were increased mainly due to the crowd visiting pandals which also creates traffic congestion.

Table 6.4: Equivalent Continuous (L_{Aeq})dB(A), Noise Levels in Pune

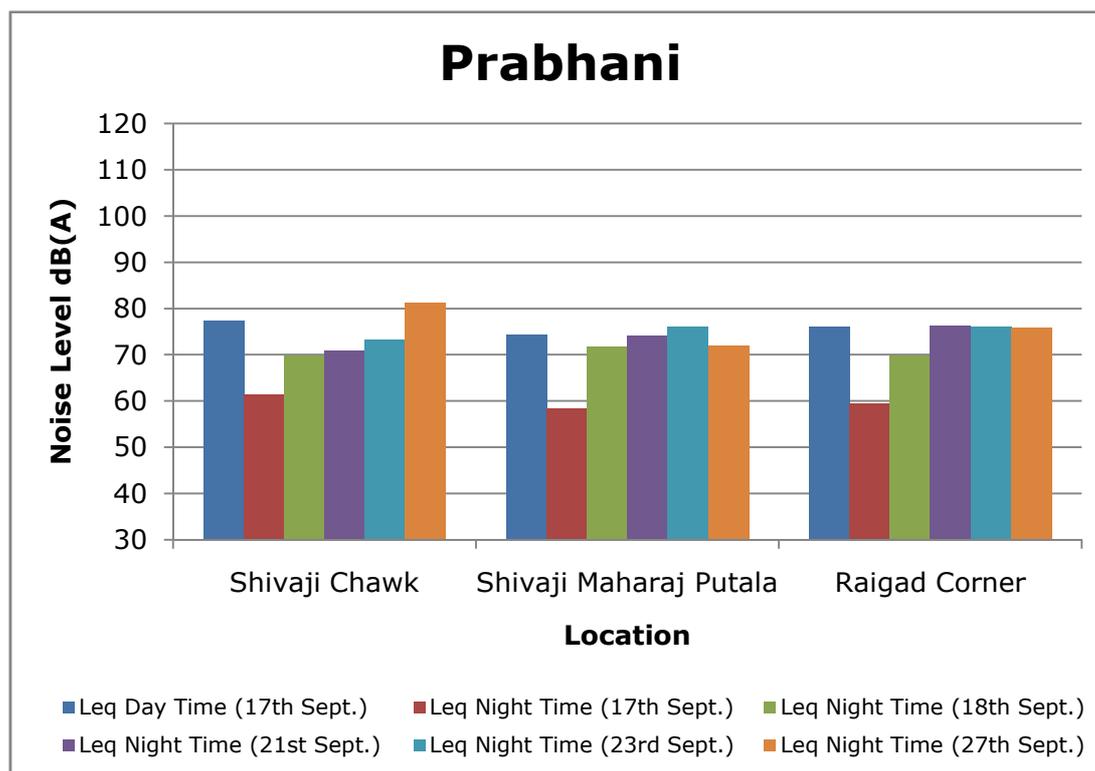

Chart 6.22: Noise levels during Ganesh festival in Pimpri - Chinchwad

23. Prabhani

In the five location monitored in Navi Mumbai, the highest noise level was observed at Uran - Ganpati Chowk with 92.1 dB(A) on 27th September. The noise level during night time exceeded the permissible limit. The increase in noise level is due to the pandals and also traffic caused due to the proceedings of visarjan.

Table 6.23: Equivalent Continuous (L_{eq})dB(A) Noise Levels in Prabhani

| Location | L_{eq} Day Time (17 th Sept.) | L_{eq} Night Time (17 th Sept.) | L_{eq} Night Time (18 th Sept.) | L_{eq} Night Time (21 st Sept.) | L_{eq} Night Time (23 rd Sept.) | L_{eq} Night Time (27 th Sept.) |

Comparative Study of Noise levels

Comparative study of the last three years, i.e. 2013 – 2015 shows that the average noise levels in all the cities eventhough increased this year is lesser than the noise levels during 2013. There is difference in the days selcted for noise monitroing on al three years as in 2013 we have monitored the last five days of Ganesh festival, in 2013 we have monitored on the important days of Ganesh festival and now in 2014 we have monitored on important days of noise monitoring with also including days when there was no visargan carrying on .

Comparative study shows the follwing results in different cities of Maharashtra:

Mumbai: Comparative study shows that this year the highest aveage noise level was observed in Byculla as compared to last 3 years.

Navi Mumbai: The noise level in Navi Mumbai was high this year as compared to last three years. The highest average noise level was observerd at Uran on all five days.

Thane: In Thane, the noise level was niether less nor higher this year as compared to last three years. The highest noise level was observed at Court Naka on majority of the days monitored.

Pune: Even though the noise level in Pune increased this year, it was lesser as compared to last two years. There was increase in noise level of Koregaon park on majority of the days monitored as compared to the last three years.

Nashik: The noise level in Nashik is similar to those obsereved in the previous two years.

Aurangabad: The noise level in Aurangabad on the first day of monitoring was high as compared to the previous two years.

Nagpur: The observed noise level was more or less the same as observed last year.

Kalyan: Bhiwandi and Ulhasnagar station was observed with average high noise levels this year.

Amravati: The noise level in Amravati remained the same as previous year with no increase or decrease.

Jalgaon: In Jalgaon, the average noise level have increased in the last day of monitoring as compared to last two years.

Kolhapur: The average highest noise level in Kholapur this year was observed at Mahalaxmi Mandir. Also at Khas Baug Maidan, the average noise level even crossed 100 dB(A) on the last day of monitoring.

Satara: In Satara, there was no difference in the noise level observed as compared to last two years.

Annexure VI Noise Levels during Ganesh Festival for last 3 years in different cities of Maharashtra

Conclusion

This year 47 new locations have been added to the list of monitoring during Ganesh festival by Maharashtra Pollution Control Board. 132 locations from 26 Municipal Corporation of Maharashtra for 5 days period during Ganesh Festival i.e. on 17th, 18th, 21st, 23rd & 27th September 2015 for 24 hours on the first day of monitoring and from 6 PM to 12 AM in the remaining four days for each location which comprise of residential, commercial and silence zone. The average noise levels observed were higher than the prescribed standards.

These noise levels are cumulative effect of the various sources of noise including traffic, domestic activities, construction etc. However the use of loud speakers are the significant contributors over the short span of activities. The peak values observed during the study are directly linked to the drums and loud speakers which are easily available and relatively cheap.

There seems to be decrease in the noise level during night time which indicates the year by year people are getting more and aware of the ill effects of the high noise level. Even then, more efforts can be made in controlling the noise pollution caused by the festivals.

Definitions

A-Weighting

"A-weighting" is the frequency weighting characteristic as specified in IEC 123 or IEC 179 and intended to approximate the relative sensitivity of the normal human ear to different frequencies (pitches) of sound.

A-weighted Sound Pressure Level

The "A-weighted sound pressure level" is the sound pressure level modified by application of the A-weighting. It is measured in dBA, A-weighted, and denoted as dBA.

Decibel

The "decibel" is a dimensionless measure of sound level or sound pressure level; see sound pressure level.

Equivalent Sound Level

The "equivalent sound level" sometimes denoted L_{eq} , is the value of the constant sound level which would result in exposure to the same total A-weighted energy as would the specified time-varying sound, if the constant sound level persisted over an equal time interval. It is measured in dBA.

Fast Response

"Fast response" is a dynamic characteristic setting of a sound level meter meeting the applicable specifications.

Percentile Sound Level

The "x percentile sound level", designated L_x , is the sound level exceeded x percent of a specified time period, It is measured in dBA.

Sound

"Sound" is an oscillation in pressure, stress, particle displacement or particle velocity, in a medium with internal forces (e.g. elastic, viscous), or the superposition of such propagated oscillations, which may cause an auditory sensation.

Sound Level

"Sound level" is the A-weighted sound pressure level.

Sound Level Meter

A "sound level meter" is an instrument which is sensitive to and calibrated for the measurement of sound.

Sound Pressure Level

The "sound pressure level" is twenty times the logarithm to the base 10 of the ratio of the effective pressure (p) of a sound to the reference pressure (P_r) of 20 μ Pa. Thus the sound pressure level in dB = $20 \log_{10} P/P_r$.

ANNEXURE II

Annexure II - Sound Level Meter

MS 6701, Type II

ANNEXURE III

Annexure III - Noise Pollution (R & C) Rules, 2000 amendment dt. 21st April 2009

ध्वनी प्रदूषण (नियंत्रण व नियमन) नियम, २०००
ची प्रभावीपणे अंमलबजावणी करण्यासाठी
प्राधिकरणाची नियुक्ती करण्याबाबत

महाराष्ट्र शासन

पर्यावरण विभाग, मंत्रालय,

शासन निर्णय क्रमांक : ध्वनीप्र-२००९/प्र.क्र.९५/तांक-१

नविन प्रशासन भवन, १५ वा मजला, मादाम कामा रोड, मुंबई - ४०० ०३२

दिनांक: २१ एप्रिल, २००९

- वाचा - १) शासन निर्णय क्रमांक : ध्वनीप्र-२०००/प्र.क्र.२४/तांक ३, दिनांक १६ ऑगस्ट, २००० आणि दिनांक १५ जून, २००१
२) मे. उच्च न्यायालयाच्या मुंबई खंडपीठामध्ये दाखल करण्यात आलेल्या सार्वजनिक हिताच्या याचिका क्र. (१) २०५३/२००३, (२) ७४/२००७, (३) ८५/२००७ आणि (४) १/२००९ मधील दिनांक २६/२/२००९ चे आदेश

प्रस्तावना :-

पर्यावरण विभाग, शासन निर्णय क्र. एन.पी./२०००/२४/क्र.३, दिनांक १६/८/२००० व दिनांक १५/०६/२००१ रोजी ध्वनी प्रदूषण (नियंत्रण व नियमन) नियम, २००० च्या २ (क) नुसार, राज्यातील पोलीस आयुक्त असलेल्या शहरामध्ये पोलीस उप आयुक्त व इतर ठिकाणी जिल्हा पोलीस अधिक्षक यांना एक सदस्य प्राधिकरण म्हणून ध्वनी प्रदूषण नियमाची अंमलबजावणी करण्यासाठी नियुक्ती करण्यात आली आहे.

मा. उच्च न्यायालय, मुंबई खंडपीठाने वरील याचिकांमध्ये महाराष्ट्र शासन व इतर विभागांनी ध्वनी प्रदूषण (नियंत्रण व नियमन) नियम, २००० ची प्रभावी अंमलबजावणी करण्याकरीता दिनांक २६/२/२००९ रोजी ठराविक निर्देश दिलेले आहेत. त्यानुसार स्थानिक स्वराज्य संस्थांनी शहरी भागात शांतता झोन जाहीर करणे आवश्यक आहे.

शासन निर्णय :-

१) मा. उच्च न्यायालयाच्या आदेशानुसार तसेच ध्वनी प्रदूषण (नियंत्रण व नियमन) नियम, २००० च्या कलम ३ (५) नुसार स्थानिक स्वराज्य संस्थांनी शहरी भागात शांतता झोन त्वरीत जाहिर करून योग्य ते आदेश काढावेत. तसेच शहरात शांतता झोनचे फलक लावून आदेशाची प्रभावी अंमलबजावणी करण्यासाठी योग्य ती प्रसिध्दी करावी.

- १) शैक्षणिक संस्थांच्या सभोवताली १०० मीटर क्षेत्र
- २) सर्व न्यायालयांच्या सभोवतीली १०० मीटर क्षेत्र
- ३) रुग्णालयांच्या सभोवताली १०० मीटर क्षेत्र

२) ध्वनी प्रदूषणाची वाढती पातळी व निरनिराळे प्रदूषण स्रोत विचारात घेता, शासनाच्या निरनिराळ्या विभागांनी सद्यःस्थितीत ते राबवीत असलेल्या नियमाद्वारे ध्वनी प्रदूषण नियंत्रण व नियमनाची अंमलबजावणी करावी. त्याकरिता परिशिष्ट १ मध्ये नमूद केल्याप्रमाणे, शासनाच्या संबंधित विभागांच्या अधिपत्याखालील संस्थांच्या अधिकाऱ्यांना पदनाम प्राधिकरण म्हणून जाहीर करण्यात येत आहे. याबाबत संबंधीत

रोटा/एच-०१००[५००-५-२००९]-१

विभागांनी स्वतंत्र आदेश निर्गमित करावेत. सदर प्राधिकरण, ते राबवित असलेल्या नियमांच्या तरतुदीनुसार तसेच ध्वनी प्रदूषण (नियंत्रण व नियमन) नियम, २००० च्या तरतुदीनुसार ध्वनी प्रदूषण नियंत्रण व नियमनाची कार्यवाही करण्यास सक्षम असेल.

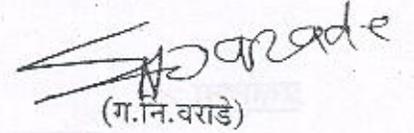

A.

३) ध्वनी प्रदूषण करणारे उपकरणे / स्रोत जसे D.G. Sets (15-500 KVA); Coal Washeries ; Fire Crackers Generator Sets with Diesel (upto 1000 KVA) manufactured on or after 1st July, 2003 ; Vehicles a manufacturing stage from the year, 2003 and 1st April, 2005 respectively as well as Noise Limits for Automobiles and Domestic appliances and construction equipments at the manufacturing stage laid down under the provisions of the Environment (Protection) Act, 1986 and Rules made there under इत्यादींची, सभोयतालच्या हवेतील ध्वनी प्रदूषण गुणवत्तेच्या विहित मर्यादा परिशिष्ट २ मध्ये नमूद केल्याप्रमाणे असेल.

४) या शासन निर्णयान्वये, पर्यावरण विभागाने यापूर्वी दिनांक १६ ऑगस्ट, २००० आणि दिनांक १५ जून, २००१ रोजी या विषयाबाबत निर्गमित केलेला शासन निर्णय खारीज करण्यात येत आहे. हा शासन निर्णय निर्गमित झाल्याच्या दिनांकापासून लागू राहील.

महाराष्ट्राचे राज्यपाल यांच्या आदेशानुसार व नावाने.

B.

ध्वनी प्रदूषण व नियमन व नियंत्रणाची अंमलबजावणी करण्यासाठी शासनाच्या अधिपत्याखाली असलेल्या संस्थांमधील संबंधीत अधिका-याची पदनाम प्राधिकरण म्हणून नियुक्ती

| Sr. No | Officer /Agency | Concerned Department | Duties |
|--------|--|--|--|
| 1. | District Magistrate, Sub-Divisional Magistrate, | Revenue | Corresponding Rules for the enforcement of the Noise Pollution Control measures within their respective jurisdiction. |
| 2. | Police Commissioner or any other officer not below the rank of the Deputy Superintendent of Police designated for the maintenance of Ambient Air Quality Standards, as mentioned in the Rule 2(c) of Noise Pollution(Regulation and Control) Rules, 2000. | Home | The Police Authorities will be responsible for initiating further legal actions in respect of the violations.. |
| 3. | Municipal Commissioner, Additional/Deputy Municipal Commissioner/ Chief Officer of Municipal Council/Committee Govt. of Maharashtra not below the rank of the Deputy Superintendent of Police. | Urban Development | <p>Corresponding Rules for the enforcement of noise standards laid down under the Environment (Protection) Rules, 1986 at source for construction projects, utilities for buildings (ACs, DG sets etc.), domestic appliances, development and other activities in their jurisdiction.</p> <p>The urban local bodies shall be responsible for demarcation of the silent zones as per the Noise Rules, 2000 and displaying the same adequately.</p> <p>The urban local bodies shall include an Action Plan for noise control in the Environmental Status Report submitted by them annually, including noise monitoring and noise mapping studies.</p> <p>The Local Body and Urban Development Deptt., Govt. of Maharashtra will not grant any permissions for development activities in consistent with or in conflict with the categorization of zone. In case of overlapping zones, stringent standards will prevail over in that particular area.</p> |
| 4. | Registrar /Head Master of the Educational Institutions duly approved by the concerned Government not below the rank of the Deputy Superintendent of Police | Higher & Technical Education/ School Education | Corresponding Rules for the enforcement and maintenance of the Ambient Noise Standards laid down for domestic appliances, automobiles etc. in respect of any activity in its jurisdiction. |
| 5. | Dean/Superintendent of the Government Hospitals not below the rank of the Deputy Superintendent of Police | Public Health | Corresponding Rules for the enforcement and maintenance of the Ambient Noise Standards laid down for domestic appliances, automobiles etc. in respect of any activity in its |

| | | | |
|----|--|-----------------------------|---|
| 6. | Head of M.M.R.D.A., M.S.R.D.C., C.I.D.C.O., having local jurisdiction constituted under various Laws and Public Works Department. | Urban Development | jurisdiction. Corresponding Rules for the enforcement and maintenance of Noise Standards laid down under the Environment (Protection) Rules, 1986 at source for construction projects, utilities for buildings (ACs, DG sets etc.), domestic appliances, development and other activities in their jurisdiction These Developmental Authorities should include adequate noise abatement measures in their project activities such as noise barriers to the bridges and flyovers, tree plantation for roads etc. |
| 7. | Member Secretary and any officer Maharashtra Pollution Control Board not below the rank of the Deputy Superintendent of Police | Environment Department | (i) Monitoring of Ambient Noise Levels in case of specific requests from other authorities referred in the table and communicating the results to the respective Authorities for further necessary action at their end. (ii) For the enforcement of Noise Pollution Control Measures and Standards in industrial areas. |
| 8. | (i) Any officer from the State Transport Department / Deputy Regional Transport Officer in their respective jurisdiction not below the rank of the Deputy Superintendent of Police (ii) Head of Maharashtra State Road Transport Corporation or any officer/ Depot Manager not below the rank of the Deputy Superintendent of Police. (iii) Traffic Police Authorities not below the rank of the Deputy Superintendent of Police | Home Department (Transport) | Enforcement and maintenance of the Noise Standards laid down under Environment (Protection) Rules, 1986 and Motor Vehicles Act, 1939 for the new and operating vehicles within their respective jurisdiction. The noise levels generated by the in-use vehicles should be monitored while grant of Pollution Under Control Certificate. |

परिशिष्ट- २

Schedule
(Under rule 3(1) and 4(1)) of Noise Pollution (Control and Regulation) Rules, 1999

Ambient Air Quality Standards in respect of Noise

| Area Code | Category of Area/Zone | Limits in dB(A) Leq* | |
|-----------|-----------------------|----------------------|------------|
| | | Day Time | Night Time |
| (A) | Industrial Area | 75 | 70 |
| (B) | Commercial Area | 65 | 55 |
| (C) | Residential Area | 55 | 45 |
| (D) | Silence Zone | 50 | 40 |

- i. Day time shall mean from 6.00 a.m. to 10.00 p.m.
- ii. Night time shall mean from 10.00 p.m. to 6.00 a.m.
- iii. Silence Zone is defined as an area comprising not less than 100 meters around hospitals, educational institutions and courts. The silence zones are zones which are declared as such by the competent authority.
- iv. Mixed categories of areas may be declared as one of the four above mentioned categories by the competent authority.

*dB(A) Leq denotes the time weighted average of the level of sound in decibels on scale A which is relatable to human hearing.

A "decibel" is a unit in which noise is measured.

"A" , in dB(A) Leq, denotes the frequency weighting in the measurement of noise and corresponds to frequency response characteristics of the human ear.

Leq : it is an energy mean of the noise level, over a specified period.

2. Standards / Guidelines for control of Noise Pollution from Stationary Diesel Generator (DG) Sets.

(A) Noise Standards for DG sets (15-500 KVA)

The total sound power level, L_w of a DG set should be less than, $94+10 \log_{10} (KVA)$, dB(A), at the manufacturing stage, where, KVA is the nominal power rating of a DG set. This level should fall by 5 dB(A) every five years, till 2007, i.e. in 2002 and then in 2007

(B) Mandatory acoustic enclosure/acoustic treatment of room for stationary DG sets (5KVA and above).

Noise from the D.G. Set should be controlled by providing an acoustic enclosure or by treating the room acoustically.

The acoustic enclosure / acoustic treatment of the room should be designed for minimum 25 dB (A) Insertion Loss or for meeting the ambient noise standards, whichever is on the higher side (if the actual ambient noise is on the higher side, it may not be possible to check the performance of the acoustic enclosure/acoustic treatment. Under such circumstances, the performance may be checked for noise reduction upto actual ambient noise level, preferably in the night time). The measurement for Insertion Loss may be done at different points at 0.5 m from the acoustic enclosure/room, and then averaged.

The DG set should also be provided with proper exhaust muffler with insertion loss of minimum 25dB (A).

- A. (C) **Guidelines for the manufacturers/users of DG sets (5 KVA and above).**
01. The manufacturer should offer to the user a standard acoustic enclosure of 25 dB(A) Insertion Loss and also a suitable exhaust muffler, with Insertion Loss of 25 dB(A).
 02. The user should make efforts to bring down the noise levels due to the D.G. set, outside his premises, within the ambient noise requirements by proper siting and control measures.
 03. The manufacturer should furnish noise power levels of the unsilenced DG sets as per standards prescribed under (A).
 04. The total sound power level of a D.G. set, at the user's end, shall be within 2 dB(A) of the total sound power level of the DG set, at the manufacturing stage as prescribed under (A).
 05. Installation of a DG set must be strictly in compliance with the recommendations of the DG set manufacturer.
 06. A proper routine and preventive maintenance procedure for the DG set should be set and followed in consultation with the DG set manufacturer, which would help to prevent noise levels of the DG set from deteriorating with use.

3. Noise Level Standards for Coal Washeries

Operational / Working Zone -- not to exceed 85 dB(A) Leq for 8 hours exposure.

The Ambient Air Quality Standards in respect of noise as notified under Environment (Protection) Rules, 1986 shall be followed at the boundary line of the coal washery.

Code of Practice of Coal Washery

Water or Water mixed chemical shall be sprayed at all strategic coal transfer points such as conveyors, loading/unloading points etc. As far as practically possible conveyors, transfer points etc. shall be provided with enclosures.

- * The crushers/pulverizers of the coal washeries shall be provided with enclosures, fitted with suitable air pollution control measures and finally emitted through a stack of minimum height of 30m, conforming particulate matter emission standards of 150 mg/Nm³ or provided with adequate water sprinkling arrangement.
- * Water sprinkling by using fine atomizer nozzles arrangement shall be provided on the coal heaps and on land around the crushers/pulverisers.
- * Area, in and around the coal washery shall be pucca either asphalted or concreted.
- * Water consumption in the coal washery shall not exceed 1.5 cubic meter per tonne of coal.
- * The efficiency of the settling ponds of the waste water treatment system of the coal washery shall not be less than 90%.
- * Green belt shall be developed along the road side, coal handling plants, residential complex, office building and all around the boundary line of the coal washery.
- * Storage bunkers, hoppers, rubber decks in chutes and centrifugal chutes shall be provided with proper rubber linings.

* Vehicles movement in the coal washery area shall be regulated effectively to avoid traffic congestion. High pressure horn shall be prohibited. Smoke emission from heavy duty vehicle operating in the coal washeries should conform the standards prescribed under Motor Vehicle Rules, 1989.

4. Noise Standards for fire-crackers

A.(i) The manufacturer, sale or use of fire-crackers generating noise level exceeding 125 dB(A) or 145 dB(C)_{pk} at 4 meters distance from the point of bursting shall be prohibited.

(ii) For individual fire-cracker constituting the series (joined fire crackers), the above mentioned limit be reduced by $5 \log_{10} (N)$ dB, where N=Number of crackers joined together.

B. The broad requirements for measurement of noise from fire-crackers shall be-

(i) The measurements shall be made on a hard concrete surface of minimum 5 meter diameter or equivalent.

(ii) The measurement shall be made in free field conditions i.e., there shall not be any reflecting surface upto 15 meter distance from the point of bursting.

(iii) The measurement shall be made with an approved sound level meter.

C. The Department of Explosives shall ensure implementation of these standards.

5. Noise Limits for Generator Sets run with diesel

Noise limit for diesel generator sets (upto 1000 KVA) manufactured on or after 1st July, 2003

The maximum permissible sound pressure level for new diesel generator (DG) sets with rated capacity upto 1000 KVA, manufactured on or after the 1st July, 2003 shall be 75 dB(A) at 1 meter from the enclosure surface.

The diesel generator sets should be provided with integral acoustic enclosure at the manufacturing stage itself.

The implementation of noise limit for these diesel generator sets shall be regulated as given in below mentioned paragraph.

Requirement of certification

Every manufacturer of engine or every importer of engine or product must have valid certificates of Type Approval and certificates of Conformity of Production for each year, for all engine models being manufactured or for all engines or product models being imported, after the effective date with the emission limit as specified in earlier paragraph.

6. (1) Noise limits for vehicles applicable at manufacturing stage
from the year, 2003.

| Sr.No. | Type of Vehicle | Noise Limits dB(A) | Date Implementation of |
|--------|---|--------------------|-------------------------------|
| (1) | (2) | (3) | (4) |
| 1. | Two Wheeler | | 1 st January, 2003 |
| | Displacement upto 80 cm ³ | 75 | |
| | Displacement more than 80 cm ³ but upto 175 cm ³ | 77 | |
| | Displacement more than 175 cm ³ | 89 | |
| 2. | Three Wheeler | | 1 st January, 2003 |
| | Displacement upto 175 cm ³ | 77 | |
| | Displacement more than 175 cm ³ | 80 | |
| 3. | Passenger Car | 75 | 1 st January, 2003 |
| 4. | Passenger or Commercial Vehicles | | 1 st July, 2003 |
| | Gross vehicle weight upto 4 tonnes | 80 | |
| | Gross vehicle weight more than 4 tonnes but upto 12 tonnes | 83 | |
| | Gross vehicle weight more than 12 tonnes | 85 | |

(2) Noise Limits for vehicles at manufacturing stage applicable on and from 1st April, 2005

| Sr.No. | Type of vehicles | Noise Limits |
|--------|--|--------------|
| 1.0 | Two Wheelers | |
| 1.1 | Displacement upto 80 cc | 75 |
| 1.2 | Displacement more than 80 cc but upto 175 cc | 77 |
| 1.3 | Displacement more than 175 cc | 80 |
| 2.1 | Three Wheelers | |
| 2.1 | Displacement upto 175 cc | 77 |
| 2.2 | Displacement more than 175 cc | 80 |
| 3.0 | Vehicles used for the carriage of passengers and capable of having not more than nine seats, including the driver's seat | 74 |
| 4.0 | Vehicles used for the carriage of passengers having more than nine seats including the driver's seat and a maximum Gross Vehicle Weight (GVW) of more than tonnes | |
| 4.1 | With an engine power less than 150KW | 78 |
| 4.2 | With an engine power of 150 KW or above | 80 |
| 5.0 | Vehicles used for the carriage of passengers having more than nine seats including the driver's seat: Vehicle used for the carriage of goods. | |
| 5.1 | With a maximum GVW not exceeding 2 tonnes | 76 |
| 5.2 | With a maximum GVW greater than 3 tonnes but not exceeding 3.5 tonnes | 77 |
| 6.0 | Vehicles used for the transport of goods with a maximum GVW exceeding 3.5 tonnes | |
| 6.1 | With an engine power less than 75 KW | 77 |
| 6.2 | With an engine power of 75 KW or above but less than 150KW | 78 |
| 6.3 | With an engine power of 150 KW or above | 80 |

7. Noise Standards Part E:-

A. Noise limits for Automobiles (Free Field Distance at 7.5 meter in dB(A) at the manufacturing stage.

| | | |
|-----|--|----|
| (a) | Motorcycle, Scooters and Three Wheelers | 80 |
| (b) | Passenger Cars | 82 |
| (c) | Passenger or Commercial vehicles upto 4 MT | 85 |
| (d) | Passenger or Commercial vehicles above 4 MT and Upto 12 MT | 89 |
| (e) | Passenger or Commercial vehicles exceeding 12 MT | 91 |

B. Domestic appliances and construction equipments at the manufacturing stage to be achieved by 31st December, 1993.

| | | |
|-----|---|-------|
| (a) | Window Air Conditioners of 1 ton to 1.5 ton | 68 |
| (b) | Air Coolers | 60 |
| (c) | Refrigerators | 46 |
| (d) | Diesel generator of domestic purposes | 85-90 |
| (e) | Compactors (rollers), Front Loaders, Concrete Mixers, Cranes (moveable), Vibrators and Saws | 75 |
